

Fact Sheet

Company Overview

TransDevelopment is the world's leading developer of specialized automotive distribution and transportation facilities. The company provides a wide range of advisory and development management services. Since its founding in 1987, TransDevelopment has completed more than 80 large-scale development projects and 300 consulting engagements.

History

TransDevelopment was established in 1987 to provide development services exclusively for the transportation industry. In 1993, the company began expanding into international markets. Since that time, TransDevelopment has developed facilities in Mexico, Canada, South America, Korea and Europe.
